Thus, along with a lot of other sewing machine's accessories,.Gastrointestinal manifestations of rheumatic diseases. Rheumatic diseases include a wide variety of clinical presentations. The appropriate approach depends on the type of rheumatic disease and its potential associated complications. Although the liver, stomach, and pancreas may be involved in various rheumatic diseases, most rheumatic patients have few or no gastrointestinal manifestations. Rheumatic diseases that cause gastrointestinal manifestations have varied clinical presentations. There is no specific test that can distinguish an autoimmune or infectious disease from a nonautoimmune, idiopathic, or ischemic gastrointestinal syndrome. In the management of a patient with gastrointestinal symptoms who 754eb5d184
