Include a FOU in the form of a KMACRO KMACRO Parameters: ¶ Include a description of the FOU to appear in the KMACRO. This includes the FOU name, the number of times to repeat, and the phrase or words to appear in the description. ¶ A space is required after the KMACRO name in the macro, and before the parameters. ¶ The description in the KMACRO is terminated by the keyword END. ¶ The description in the KMACRO appears in the same place in the KMACRO as it appears in the FOU. The description of the KMACRO appears in the very same line as the FOU. ¶ When the KMACRO is closed, the user will be asked if they would like to save the KMACRO before it is deleted from the FOU. ¶ A space is required before the parameter in the KMACRO. ¶ If the KMACRO contains more than one parameter, the parameters appear on separate lines. ¶ A space is

required before and after the parameters. ¶ The parameter names are unique to each FOU. Therefore, if the parameter list in a KMACRO is identical to the parameter list in another FOU, the parameters will be identical. ¶ If the user enters a number in the KMACRO, the number will be saved to the FOU. ¶ If the user enters the words "label" or "labels" in the KMACRO, the label should appear in the FOU as well. ¶ The label description and the KMACRO should appear in the same line. ¶ The same KMACRO can be used multiple times in the same FOU. ¶ The KMACRO can appear on any part of the drawing where a FOU is placed. ¶ The KMACRO and the FOU can share the same space on the drawing. ¶ If a FOU is added to a layout, the same KMACRO will be used. ¶ The KMACRO will not create its own instances. If a KMACRO is created in the same FOU as another KMACRO, it will only be one KMACRO in the FOU. ¶ The KMACRO and the FOU will not appear in the
