The datagrid is showing in a tab. in my code my datagrid is filled with data. when I click on a button I want to show this in my full screen. I mean it to be like a list view where everything is shown. I want my datagrid to be the detailview. A: You need to programmatically show your form. Use Form.ShowDialog Method. Silent Hill 4: The Room (US) American, French, German, Mexican, Brazilian, Greek... the list is nearly endless. Silent Hill has been translated into even more languages than that. It's a weird game, and I mean that in the way in which it relates to Silent Hill 2, for the majority of it is fairly standard action-stealth horror. But there's very little else in Silent Hill that falls into that definition. It is, in essence, a stand-alone Silent Hill game, but a very unique one. The story is remarkably linear for a Silent Hill game. You know it's coming. You know what you
