If the driver for your hardware is not included with Windows,.Resonant coupling and intracavity absorption enhancement in mid-infrared active laser diodes with GaSb microcavities. We report on the use of GaSb microcavities for enhancing the mid-infrared gain and absorption properties of an active laser diode. A resolution of 1 MHz and a linewidth of 300 kHz are demonstrated, confirming the low phonon loss in GaSb devices. This low loss is shown to enhance the intracavity absorption and laser action by more than an order of magnitude. Association between the prevalence of chronic kidney disease in the community and home water treatment characteristics. The effect of household water treatment practices on health outcomes in communities with a high prevalence of chronic kidney disease is unknown. We hypothesized that communities with a higher prevalence of chronic kidney disease would have higher rates of home water treatment, lower access to public water systems, and greater numbers of water quality violations. The study population included adult participants of the National Health and 754eb5d184
