The eclipse user manual for the device can be found here (docs.clearcom.com/webroot/f/eclipse/docs-html/eng/ee-clearpico.html).Q: How to use Apache fop in the Glassfish application server? Is there any way to get Glassfish 3 to know about Apache FOP? We have installed Apache FOP on the server (because our document does not include Java source files and we need to clean a couple of PDF documents). How do we get Glassfish 3 to know about Apache FOP? I thought maybe I

could add a symlink to the Apache FOP installation which points to the FOP which is available in the Glassfish installation, but I'm not sure how to do this. A: You could put your fop.xml into glassfish_home\domains\domain1\config\templates, then reload the web application and there should be an option to select the default FOP (glassfish uses Glassfish-specific FOP rather than the standard Apache version). A: I did this by modifying the remote file's META-INF/services/javax.xml.validation.Schema. Sen. Bernie Sanders (I-VT) doubled down on his own \$15

minimum wage proposal in an interview with The Hill on Thursday, responding to criticisms from Sen. Marco Rubio (R-FL) that the federal government shouldn't have a role in setting wages. "Let me tell you something, my friends," Sanders said on "Fox News Sunday." "We have got to go forward and make sure that people can live in dignity in this country." "It is not enough to just have a minimum wage of 10 or 12 bucks. It is not enough to say to [Walmart] that you are going to raise the minimum wage on July 1st, that means you are going to be paying \$3

more for that 20-year-old and that 14-year-old. It will not do that. It will wipe them out." Sanders' comments come just days after f30f4ceada
