What's New in the Aspose.Email For SharePoint?

E-mail is a tool of communication that is primarily useful for people who send and receive messages using computers. The benefit of e-mail is that it allows you to easily send messages to other people,

---

and it is very portable, meaning you don't have to be at your computer to send out a message. However, it can be a difficult task to create great e-mails, especially if you are not a professional designer. The images you send out may look out of place. You may forget to put in important elements like your company logo. The color might not contrast with the rest of the e-mail. Also, the recipient may not be able to properly interpret your message. You can start having these problems even if you are an expert user of the program. While it is possible to create great looking e-mails using Microsoft Word, there is a better way. With Aspose.Email for SharePoint, you

---

can create e-mail messages that look great, and even allow the recipient to easily reply to your e-mail. You can also quickly build e-mail messages using Aspose.Email for SharePoint without needing any prior knowledge of design. Aspose.Email for SharePoint Features Aspose.Email for SharePoint provides many features to help you build great looking messages, including: No prior design knowledge is needed when using Aspose.Email for SharePoint You don't need to learn how to use the feature of the program. You will quickly be able to create and send great looking e-mails using Aspose.Email for SharePoint. The program allows the recipient to easily

---

reply to your e-mails. They can also forward your e-mail to a friend, share your e-mails on Facebook or other social sites. You can also easily attach files and attachments. The recipient can open these attachments or attach them to the e-mail they send out. You can quickly and easily save the result of the design into a PDF file. The Aspose.Email for SharePoint PDF component lets you quickly and easily convert message content into the PDF format without a need to leave your design. You can save your work on the format you are used to by simply saving the final project into a.pdf,.docx or.xlsx file. You can send out e-mails using different working
