AutoCAD is widely used by architects and interior designers, engineers and architects, carpenters, and other designers. AutoCAD is also used by educators for teaching purposes. Currently, AutoCAD is still a popular choice for both software engineers and those who wish to become software engineers. In addition to offering a diverse line of Autodesk-developed products, Autodesk sells a number of other software products that are geared towards various types of users. Autodesk's other software products include its many solutions for architects, interior designers, engineers, and carpenters. What Does AutoCAD Do? AutoCAD is a digital front-end for an old graphics program called MicroStation that runs on a mainframe or mini-computer. (This article is about AutoCAD as an internal graphic program, but you can read more about how the program interacts with MicroStation on Wikipedia.) The majority of AutoCAD's processing is handled in the background, while you work on the current drawing. Before AutoCAD, it was often necessary for users to work with more than one CAD program simultaneously. After AutoCAD was introduced, it became possible to switch back and forth between a drawing and AutoCAD with ease. Drawing Functions During the development of AutoCAD, drawing functions that are part of the AutoCAD package were added in stages. However, there are a number of AutoCAD features that have been added over the years, including the following: Rulers Rulers let you mark or measure points and lines in a drawing. You can mark or measure points and lines on the screen (screen coordinates) or on the X,Y axes of the drawing (paper coordinates). All features are editable. You can change a ruler's size, color, unit type, grid spacing, and labeling. The new ruler tool lets you draw from any scale on the drawing canvas, so you can change the units. Perspective Projection The new perspective tools in AutoCAD feature ruler units. The ruler unit will be calibrated to a scale of 1/64 of an inch to a scale of 4 inches (it can also be calibrated to a scale of 0.01 of an inch to a scale of 0.25 of an inch). The editor window is the same for all scale options. You can switch from the default 1/64

Autodesk Authorized Resellers (AARs) can include an Autodesk OEM, or Autodesk Technical Reseller, An Autodesk Technical Reseller is a company who may sell licenses to Autodesk software, but is not a commercial Autodesk Authorized Dealer (AD). Technical resellers sell Autodesk products and provide technical support to clients. AARs are also Autodesk Authorized Training Resellers, and are able to provide training. Autodesk Authorized Resellers are allowed to charge customers for the difference between the "List Price" of an Autodesk product and the retail price offered by the reseller. The reseller keeps the retail markup on Autodesk products, and Autodesk keeps the discount. Licensing of Autodesk products Autodesk Authorized Dealers (ADs) are Autodesk's full-service retail sales partners. They are authorized to sell, configure, support, and service Autodesk software products in North America, and to provide local representation and support for Autodesk software products to Autodesk Authorized Resellers. Autodesk Authorized Dealers are the only organization that may list or sell Autodesk products. Autodesk Authorized Consultants (ACs) are Autodesk reseller partners who provide reseller services, technical training, and support. Autodesk Authorized Consultants are permitted to sell Autodesk software only under the conditions of a valid AD or Independent Authorized Consultant Agreement. The AD fee for Autodesk software products is set by Autodesk Authorized Dealer software and services. Consultants are required to purchase Autodesk Authorized Software from Autodesk Authorized Dealers at the prevailing prices at the time of the purchase agreement. Autodesk Authorized Training Partners (ATPs) are Autodesk Authorized Training Resellers. Autodesk Authorized Training Partners may sell Autodesk software products only under the conditions of a valid AD, ATA, or Independent Training Partner Agreement, and the purchase price is set by Autodesk Authorized Dealer Software and Services. Technical support Autodesk Authorized Dealers and Technical Resellers have an agreement with Autodesk to provide software support and updates on an annual fee basis. Support may be provided through a network of Technical Support Centers. Independent Author
