My memory gets worse as I get older, but the windows of the Sistine Chapel are still one of my favorite memories. I don't think I've ever been to the place where you actually can stand up on the ceiling of the Sistine Chapel and look out at the whole of Christianity. The ceiling really is enormous. So huge, in fact, that when you're up there you have to get really close to it to be able to make out details, and you can't really see it all at once. It's a powerful place, and I'm glad to have been there. My wife and I were able to go up there last week. We were there yesterday morning, and were able to enjoy the ceiling and the Michelangelo before the crowds piled up and we had to leave. It's a long museum, with many rooms full of masterpieces, and statues and paintings and illuminated manuscripts, and I'm glad we'd done enough to see quite a bit of the main halls. But even so, there was still so much we hadn't seen, and the Piazza del Campo outside was so beautiful, it was hard to imagine that in another day we'd be back there, experiencing that. We walked around for a while, and used up most of the time, but nothing filled the sense of discovery
