A: Javascript (Node): async function downloadDosai({ imageLink }: { imageLink: string }) {
 let image = await readFile(imageLink); console.log(image); let response = await
 fetch(imageLink); let img = await response.blob(); let { type } = await response.headers(); if
 (type !== 'image/jpeg') { return image; } return await image.slice(0, 250 * 1024) .toBuffer()
 .then(buf => { return new Promise(resolve => { fs.createWriteStream('/tmp/file.jpg', {
 encoding: 'binary', }, buf); }); }); } export async function downloadFile({ imageLink }: {
 imageLink: string }) { await downloadDosai(imageLink); } I've used Json-server for Node. It
 returned a jpeg with the binary content, and slice() method works fine if you want to save the
 file for the server. Q: How to find count of records with same value(after finding count of
 records in each group)? I have a table consists of many record, where every record contains a
 user, site, and month. Below is the data, where by joining these 3 columns I am able to find
 what are the user and site that has been visited for the month. However I am trying to find out
 how many of them there are. So I want to count the number of same user and same site (even
 though there can be many instances) that has been visited in one particular month. user site
 month user1 site1 Feb user1 site1 May user1 site2 Jan user1 site3 Feb user2 site1
