This product includes the following folder structures: Changelog:

---

----- 1.07 release (05/03/2010)

----- \* Added some Swedish words to the database. \* Added a less ugly font to the monospace font selection. \* Added support for Chinese language. \* Added online help in Chinese language. \* Added back the './help' feature which was removed for some reason. \* Made the 'Tools' menu a separate page rather than a sub-menu of the file menu. 1.02 release (11/26/2008)

----- \* Made some small changes to the application, but nothing too serious. \* The application now automatically switch to a Japanese font if the input language changes. 1.01 release (11/20/2008) ----- \*

Added a folder where you can save

---

attachments for e-mails you receive. \*

Added a rule to prevent the application from running at startup. \*

Added the ability to choose the box size for entry boxes in the list of suggested words. \*

Added an option to use the 'Spacebar' instead of 'Shift' for creating a new entry.

\* Added support for voice input of suggested words (v1.0). \*

Added a help application and some other small changes.

1.0 release (11/12/2008)

----- \*

Everything is working now. Anumaan 1.0 will be available on the Yahoo App Catalog in the near future. \*

You can now select one of the available language inputs from the Interface language (mixed) input boxes. \*

The application now uses the standard

---

'Add to Database' and 'Remove from Database' commands in the Applications area. \* The list of suggested words

What's New in the?

----- Anumaan can recognize the text you type in. But Anumaan doesn't suggest the most frequently used words. You can easily add words to the suggested words list through typing them into Anumaan. Anumaan supports more than 70 languages. And you can easily edit the database contents. You can share your Anumaan database file with other people via the File Sharing tab of Anumaan. Anumaan is free, totally portable and there is no limitation on its functionality.

---
