Category:Network analyzers1. Field of the Invention The

invention relates to a fluorescent lamp with a housing, which is provided with an aperture, the fluorescent lamp being installed in the housing with the base placed against the bottom of the housing. 2. Description of Related Art This type of fluorescent lamp is known from DE-OS 25 08 262. The fluorescent lamp described here is fitted into the shell of a lamp holder, with the base of the lamp being laterally guided in a base socket. The base socket is held in the housing of the lamp holder. It is the object of the invention to produce a fluorescent lamp of the type mentioned here that can be fitted more simply and, at the same time, with greater stability. In the fluorescent lamp according to the invention, the base of the fluorescent lamp is provided with attachment hooks, which run transversely to the longitudinal axis of the fluorescent lamp, extend over
