PDF Conversion Series - PDF2Htm Crack Free

Nowadays, as the way of surfing the web and searching, your customers will not stop to switch to a web site that have a credible PDF files. Many web sites use PDF file for their web pages and make PDF documents available to users who can view them easily. The customers can see your web pages or your PDF documents by using their web browsers with Adobe Acrobat Reader. But some customers want to search your site more quickly and easily. If they have one PDF document, they may download it and save it on their local hard disks. But if they have a group of PDF files they want to view, it would be easy if they can open them on the web without downloading them. What's more, there are some customers that have different web browsers on their computers and they can only open PDF files in different browsers. This could be very inconvenient to them if your web site doesn't have a way of converting their PDF files to HTML so that they can view them easier. Even worse, some customers have no access to or are unable to use Adobe Acrobat Reader when downloading your PDF files. PDF files have a lot of advantages as an important file format. Most PDF-capable web browsers and PDF viewers support PDF files, and they can be easily viewed. You must know that HTML is a text-only markup language. An HTML document has not any format. On the contrary, a PDF file contains structured information. It can have text, graphics and images. That's why it's called Portable Document Format. In summary, PDF files are more powerful, professional and user friendly than HTML files. However, HTML files are much more flexible and convenient for webmasters to design a web page. Therefore, webmasters have a strong need to convert PDF files to HTML. This way, they can make PDF files available to web browsers that do not support PDFs. Moreover, webmasters can make PDF files available to a whole range of users. For example, desktop computers, handheld devices, and cellular phones can all use a PDF viewer. "PDF Conversion Series PDF2Htm" is the first PDF to HTML converter for webmasters. With this software, you can easily convert your PDF files to HTML. This allows your files to be indexed and made available on the internet as fully searchable documents.
