ABOUT US

Founded in 2016, SUDU Industrial is a Dubai-based high-tech enterprise specializing in innovative, eco-friendly energy solutions. We focus on the development, production, and sales of oxy-hydrogen generators, engine carbon cleaning machines, catalytic converter cleaning machines, and oxy-hydrogen welding machines. Operating from an 8,000-square-meter facility, we are committed to sustainability and technological advancement. Our oxy-hydrogen generators efficiently convert water into hydrogen and oxygen, offering a clean, powerful energy source that reduces carbon emissions and enhances industrial efficiency. With a strong focus on innovation, quality, and customer satisfaction, SUDU Industrial is driving the shift toward greener industrial practices. We're not just producing machines—we're building the future of sustainable energy.

APPLICATION

- ☐ Cutting
- ☐ Fuel Saving
- ☐ Engine Carbon Cleaning
- ☐ Restaurant & Bakery Oven Hydrogen Gas Generator
- ☐ Home Hydrogen Gas Generator
- ☐ Industrial Hydrogen Gas Generator
- ☐ Hydrogen Therapy System

OXY HYDROGEN CUTTING MACHINE DUBAI

SUDU Industrial provides high-performance oxy-hydrogen cutting machines in Dubai, designed for precision, efficiency, and safety in metal cutting applications. Our advanced machines use oxy-hydrogen technology to deliver clean, smooth, and accurate cuts with minimal heat distortion. Ideal for industries such as construction, fabrication, and automotive, these machines offer superior energy efficiency and environmental benefits compared to traditional gas cutting methods. At SUDU Industrial, we focus on delivering innovative and reliable cutting solutions that enhance productivity and reduce operational costs. With our commitment to quality and customer satisfaction, we ensure that every oxy-hydrogen cutting machine meets the highest industry standards. Choose SUDU Industrial for cutting-edge oxy-hydrogen cutting solutions in Dubai that ensure performance and durability.
